

WORLD CLASS MASSAGE CHAIR

Model: MC-2020-3D

Intelligent Voice Control System

Equipped with a high-fidelity audio system, with built-in speakers on both sides of the head and a built-in Bluetooth chip, via voice command, you can turn on the voice control mode and select the automatic massage program that you desire.

HD Large screen operating system

Large 25.5cm touch control screen, the operating system is convenient and simple, the massage process is clear at a glance. It allows you to freely control the massage program, there are 24 sets of built-in automatic programs, with just one click you control your massage experience.

USB

Equipped with 2-sets of 5v/2.1a fast charging USB ports, you can charge two different electronic devices while having a massage.

S&L Track

The MC-2020-3D has a 130cm long S&L track. It allows the back-roller arms massage from your head to beyond your Buttocks; it has greatly increased the reachable parts of the Back-3D mechanism. The back-track design is based on the human body curve and places the massage rollers in a more precise position, in relation to the Shoulders and Waist.

Full body airbag massage and heating

The airbag massage system has a total of 31 groups and of 114 airbags, covering the Head, Shoulders, Hips, Arms, Calves and Feet. Each part can be switched independently, and the Airbag strength can be selected from 6 levels. Carbon fiber Heating pads are provided on the back, buttocks and calves, to help warm the body and release fatigue.

24 Automatic programs

The MC-2020-3D has 4 groups of programs, each group has 6 Modes. You may enjoy the ultimate massage experience, Zone mode, Theme Mode, Treatment and Music therapy. You can receive a massage with the synchronized rhythm of the music you choose ... 24 programs in total!

New 3D mechanism

The 3D arms extend 8cm, they can effectively improve the comfort of the massage. The 3D mechanism has a variety of massage methods such as kneading, tapping, knocking, shiatsu and combinations. You can adjust massage methods, body part intensity per your preference.

Heart rate detection

Fingertip heart rate detection, through a photoelectric sensor, it detects the user's heartrate status and calculates other index data. It will understand the user's physical condition.

Intelligent height detection

It can automatically detect the user's height and track to match the users body shape, no matter how short or tall you are.

Customize

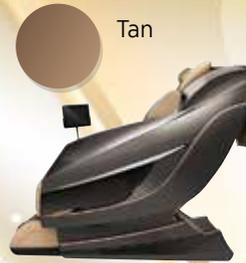

Select and save any massage position, massage speed, massage method, air pressure intensity etc. Each member of the family can save their individually personalized massage program.
